

SIZE GUIDE

Rings

1. THE RIGHT SIZE FOR YOUR FINGER

We recommend measuring your finger at the end of the day, preferably not when it is particularly hot or cold.

Remember that your hands are not exactly identical - a ring that is usually worn on a finger on the left hand will not necessarily fit the same finger on the right hand.

Ensure the ring in the chosen size slides smoothly over the entire length of your finger.

You can use a tailor's measuring tape to measure your finger, but remember to measure the circumference in millimetres.

Check the following chart to match the measurement to the most appropriate ring size.

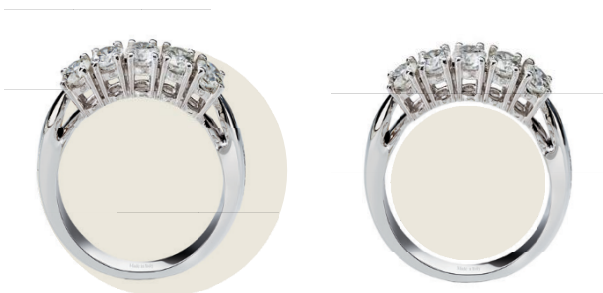

2a. HOW TO USE THE DAMIANI RING SIZE CHART

If you have a ring that perfectly fits the finger in question, you can place it over the nearest sized circle of the Damiani Ring Size Chart. Before printing, we recommend selecting the "Actual Size" printing option and not "Fit to page". If your ring appears to be in between two sizes, it is preferable to select the larger one.

INCORRECT ALIGNMENT

The inner circumference of the ring is either bigger or smaller than the circumference of the circle.

CORRECT ALIGNMENT

The inner circumference of the ring matches the circumference of the circle to perfection.

3. RING SIZE CHART

If your ring appears to be in between two sizes, it is preferable to select the larger one.

Bear in mind that ring size depends on the style of the ring: a thicker ring is worn looser than a slimmer ring.
